

Gestión de Proyectos con Github

[alexsalas]

Competencias de un administrador de proyectos

- Amplia experiencia en desarrollo de software
- Título en Áreas de la Computación
- Manejo de SDLC
- Project Management Professional (PMP)
- Postgrados en Tecnologías de Administración
- Expertos en metodologías de desarrollo de software

Gestionando un proyecto en entornos distribuidos

- Capítulo 5.
- Título 5.3

Trabajando con GitHub Issues

Anatomía de una incidencia

kneath opened this issue March 22, 2011

Issues view settings should persist

 **mislav** is assigned 

Milestone: **Ship issues2**  

I think that by hitting "/issues" you should get a persistent view. Meaning that any filters and nav elements you've clicked on are re-activated when you come back a second time. Let's start off by setting forever cookies (so things are permanently sticky, by repo). Things that should stick:

- All / Mentioned / Assigned
- Labels
- Milestone filter (reliant on [#589](#))

 kneath, defunkt, mislav, and brianmario are participating in this issue.

Milestones	Ship Issues 2.0: The Next Generation Due in 2 days
Issues	<div><div></div> #523 Ship Issues 2.0</div>
	<div><div></div> #672 Issues next API</div>
	<div><div></div> #116 Issues is slow</div>
	<div><div></div> #280 Gollum IE Issues</div>

Ship Issues 2.0: The Next Generation
Ship the fuck out of **issues2**

#578 Reference issue
Looks for gh-16 or #16 in a commit message and leaves a comment in the named **issue** referencing the commit: "Referenced by SHA" So you can be like "Fixed some
rtomayko commented
I had an idea for this that should work well on **Issues** 1.0 and be forward compatible with **Issues** 2.0: 1. Don't create **issue** comments. 2. Render referenced

#672 Issues next API
Need to update the API: - **Issues** list - By assignee - By mentioned - By multiple label - Use **issues2** search engine - **Issue** edit/create - Assignee
